

INVEST IN FUTURE TALENT WITH T-LEVELS AT THE LEIGH UTC

T-LEVELS
THE NEXT LEVEL QUALIFICATION

WHAT ARE T-LEVELS?

T-Levels are two-year technical qualifications developed with industry input to prepare students for careers or further study. They combine 80% classroom learning with 20% real-world industry placements, helping students gain the skills and experience that employers value. Each program includes a minimum 45-day work placement where students apply their knowledge in a professional setting.

WHY PARTNER WITH THE LEIGH UTC?

As a STEM-focused University Technical College based in Dartford, we specialise in Engineering and Digital fields. By hosting T-Level placements, employers can engage with motivated students and potentially nurture future talent, contributing directly to workforce readiness and innovation in the industry.

ENGINEERING

- Focuses on Manufacturing, Processing, and Control.
- Students learn to understand production processes, technical drawing, and quality assurance.
- Projects include process optimization and practical engineering applications to refine students' technical and problem-solving skills.

DIGITAL PRODUCTION, DESIGN & DEVELOPMENT

- Prepares students for roles in software and systems development.
- Covers coding, digital design, and data management.
- Students work on practical digital solutions, gaining valuable experience in digital production and project management.

BENEFITS OF PARTNERING WITH US

- **Access Future Talent:** Engage with students trained specifically in the skills your industry requires.
- **Support Community Growth:** Play a role in preparing young people in Dartford for successful careers.
- **No Obligation:** All placements are unpaid, allowing you to provide real-world experience while benefiting from fresh perspectives.
